PRASHANTH NEMADI

Software Engineer (Full Stack & AI)
+91-8147070249|Bengaluru, Karnataka |prashanthnemadi@gmail.com |LinkedIn: linkedin.com/in/Prashanth Nemadi
Portfolio: prashanthnemadi18.github.io/portfolio

PROFESSIONAL SUMMARY

Entry-level Software Engineer (2026 batch) with hands-on experience in building scalable, production-grade full-stack applications using React, Node.js, Flask, and FastAPI. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, REST APIs, Docker, and cloud deployment. Experienced in Agile workflows, JWT authentication, unit/functional testing, and telemetry metrics tracking. Passionate about building high-performance, cloud-scale products and contributing to AI-driven platforms.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript (basic)
Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Debugging
Frontend: React.js, Next.js 15, HTML5, CSS3, Tailwind CSS, Framer Motion, Responsive Design
Backend: Node.js, Express.js, Flask, FastAPI, Spring Boot, REST API, JWT Authentication
Databases: MySQL, MongoDB, PostgreSQL
Tools & Platforms: Docker, docker-compose, Vercel, Render, CI/CD pipelines, GitHub Actions Git, GitHub, VS Code

PROJECTS

AI Quiz Platform — Next.js · React · Flask · Gemini AI ·Vercel

- Architected and delivered a full-stack, scalable AI quiz application supporting camera capture, file upload, PDF export, and OAuth authentication (Google & GitHub), deployed to Vercel with CI/CD auto-deploy pipeline.
- Integrated Google Gemini AI to auto-generate MCQ, True/False, and fill-in-the-blank questions for any subject and difficulty level, eliminating manual question creation.
- Designed a mobile-responsive UI with Tailwind CSS and Framer Motion, and built an analytics dashboard to track quiz history, scores, and performance trends over time.

AI Resume Builder — React · Spring Boot · PostgreSQL · Gemini AI · Docker

- Designed and implemented a full-stack resume builder with JWT authentication, PostgreSQL database, and a weighted ATS scoring engine evaluating resumes across 6 criteria — built to production quality with test strategies for each module.
- Integrated Google Gemini AI for ATS-friendly content generation and built a GitHub analyzer that converts repository READMEs into professional resume bullet points.
- Containerized the full application with Docker and docker-compose for scalable cloud deployment on Render and AWS; implemented automated test suites to validate frontend-backend integration and API contracts.

Smart Hire ATS — React · FastAPI · MongoDB · NLP · TF-IDF

- Built a dual-dashboard Applicant Tracking System for HR and candidates using React, React Router, Tailwind CSS, with a Python FastAPI backend and MongoDB for async data operations.
- Implemented an NLP-based resume ranking algorithm using TF-IDF vectorization and Cosine Similarity — scoring candidates out of 100 with a 70% semantic match + 30% skill match weighted formula.
- Secured all API routes with JWT and bcrypt authentication, and implemented role-based access control with separate protected dashboards for HR and Candidate user roles.

INTERNSHIP EXPERIENCE

AI & Machine Learning Intern — SphereneX (Nexspyder Technologies Pvt Ltd) Jan 2026 – Apr 2026

- Designed and implemented RESTful APIs for AI-driven features, improving frontend-backend integration efficiency.
- Reduced API response latency by 20% through optimization of backend service logic and data handling pipelines.

EDUCATION

B.E. in Computer Science — Bahubali College of Engineering Aug 2022 – Jun 2026
(pursuing) CGPA: 8.1 | Shravanabelagola, Karnataka

Pre-University (Science) — Sangameshwar Composite PU College May 2020 – July2022
Percentage: 65.6% | Aminagad, Karnataka

PUBLICATION & ACHIEVEMENTS

- Published research paper: "AI-Generated Online Examination" in IJIRT (Vol 12, Issue 8, Jan 2026), covering AI-based automation of exam generation and evaluation.
- Secured 1st Place in Mathematics Day Quiz Competition at college level.
- Led a team of 4 as Team Lead in multiple college-level Hackathons, coordinating project delivery end-to-end.
